新聞 RELEASE

The Chinese University of Hong Kong announces the appointment of Dr. Yat-wah Lam as Professor of Electronics with effect from October 1, 1984.

Professor Lam, 51, graduated from Hong Kong Technical College in 1950. After spending a few years in the local service industry he left for England for further experience, becoming a Chartered Engineer in 1961. While in full-time employment in England, Professor Lam engaged in part-time studies and gained his BSc in Physics from London University in 1962, his MSc in Electrical Engineering from Birmingham University in 1965, and his PhD in Electronics from Manchester University in 1971. From 1965 to 1969, Professor Lam was Lecturer in Electronics and Electrical Engineering at Birmingham University, and from 1969 to 1971 he was the Mullard Research Fellow at Manchester University. In 1971, Professor Lam returned to Hong Kong to join as Lecturer the then newly established Department of Electronics at The Chinese University. He was promoted to Senior Lecturer two years later and to Reader in 1979. From 1974 to 1977, Professor Lam was the Head of the Electronics Department, and on many occasions also served as Acting Head of United College. He was elected Dean of the Faculty of Science in 1982.

Professor Lam is a Fellow of the Institution of Electrical Engineers and of the Institute of Physics, both in the U.K. Professor Lam's research interest lies in the field of semiconductor devices and technology. He has written numerous professional papers and his works appear frequently in international learned journals of electronics and applied physics.
