## CUHK Graduate Diploma in Advanced Nursing

The Chinese University announces the launch of the Graduate Diploma in Advanced Nursing Programme for the academic year 1993-94.

The recent developments in undergraduate nursing programmes at the Chinese University of Hong Kong and other tertiary institutions has resulted in approximately 300 nurses graduating annually, many of whom are keen to further their studies. This development has coincided with the growth of clinical nurse specialists in Hong Kong who have a particular responsibility for developing excellence in practice. This Programme, which commences in September 1993, has been designed to meet the demands of nurses wishing to develop their potential for higher degree study as well as excellence in clinical practice.

The Graduate Diploma in Advanced Nursing, which is one year full time or two years part time, includes courses of study which examine professional issues and the theory underpinning clinical practice. In addition, students will undertake a research project within a selected area of clinical specialism. Registered nurses with a Bachelor Degree in Nursing or a related discipline who have at least two years experience as a qualified nurse are eligible to apply. The closing date for application is 10th July, 1993.

The Department of Nursing of the University will host an orientation seminar on Saturday, June 5, at 10:30 am in Room 801, Oriental Centre, 67 Chatham Road South. All are welcome. Further information can be obtained from Dr. Sheila Twinn, Department of Nursing at 6097476. Application forms are available at the Department of Extramural Studies of the Chinese University at 13/F, Oriental Centre, 67 Chatham Road South.
