

新聞稿 PRESS RELEASE

香港中文大學生物學系系主任兼中大理工研究所所長張樹庭教授最近獲推選為國際微生物學會聯盟執行委員，成為首位加入該組織執委會的華人，肯定了他多年來研究及推廣蕈菌學的貢獻。

張教授對此深感榮幸，他希望藉著加入這地位崇高的國際科學組織的執委會，能提昇蕈菌學的地位，使其成為科學的其中一門分支，他更希望利用現代生物技術學，進一步推廣蘑菇育種及種植，幫助更多第三世界國家進行經濟建設，改善人民生活。

張樹庭教授是於本年八月假德國柏林舉行的國際微生物學會聯盟大會上獲推選為該組織的七人執行委員會成員，任期四年。

國際微生物學會聯盟於一九八零年成立，前身是國際微生物學會協會（成立於一九二七年）。該聯盟現有逾十萬名會員，他們來自七十個國家的一百多個微生物學會。

Professor Shu-ting Chang, Chairman of Biology Department and Director of the Institute of Science and Technology at The Chinese University of Hong Kong, has become the first Chinese to join the Executive Board of the International Union of Microbiological Societies (IUMS).

Professor Chang said that he would make good use of this opportunity to further promote the breeding and cultivation of edible mushrooms, the area he has worked hard on over the past 28 years. This field is part of the new science "Mushroomology", which means "the study of macrofungi to produce edible fleshy fruitbodies".

The IUMS has over 100,000 members from more than 100 microbiology societies from 70 countries. Professor Chang was elected Member-at-Large of the seven-member Executive Board of this renowned scientific organization this August for a 4-year-term. The organization modified its name in 1980 from the prior International Association of Microbiological Societies (IAMS) which was founded in 1927.
