新聞稿 PRESS RELEASE

Bachelor of Nursing Programme To Be Launched at
The Chinese University of Hong Kong

The Chinese University of Hong Kong announces today the launching of a Bachelor of Nursing Programme in the academic year 1991-92.

This nursing degree programme, which will commence in September 1991, is for registered nurses who wish to upgrade their qualifications. The programme will be conducted by a Department of Nursing to be formed within the Faculty of Medicine. Applications for admission to the programme will commence on January 21, 1991. Registered nurses with a minimum of 2 years' experience as a registered nurse are eligible to apply to undertake this programme on a full-time basis for 2 years or on a part-time basis for 3-4 years.

This post-registration degree programme is designed to enable nurses to develop both professionally and personally. The aims of the programme are to deepen nurses' knowledge base and to increase their effectiveness in providing patient care and promoting health in the community. The advantages of undertaking a degree programme are that graduates will have a better career prospect and that they will have attained the knowledge base necessary for undertaking further study at the post-graduate level. For further enquiries, please contact Mrs Anne Chang, Consultant in Nursing, at 6952987 or The Admissions Section, The Chinese University of Hong Kong at 6952257.
