OCTOBER 8, 1995

University Dean of Students for Chinese University

Newly appointed University Dean of Students of The Chinese University of Hong Kong, Professor Chan Kai Ming believes that a close teacher-student relation is crucial to students leading a meaningful university life, especially for year one students.

He plans to work together with the Office of Students' Affairs and Heads of the colleges to strengthen the teacher-student relations inside and outside the classroom.

Prof Chan is also the Chairman of Department of Orthopaedics & Traumatology of the University.

Educated in Hong Kong, Prof Chan said he has a real understanding of students' thinking and behaviours because he also had a "radical" life when he was a University freshman 25 years ago. He decided to accept the appointment as he understood the importance of university's life: how it shapes one's personality, helps one to discover one's talents and leads one to self fulfilment.

Besides, he will facilitate the registration of the Students' Union so that students can enjoy more freedom and independence and at the same time, learn to take up responsibilities and be accountable for their actions.

Professor Chan obtained his M.B., B.S., from the University of Hong Kong and a number of speciality fellowships in Surgery and Orthopaedics. He joined CUHK as a lecturer of Department of Orthopaedics & Traumatology in 1983 and was promoted to Professor in 1993.

He is a dedicated promoter of the development of sport medicine in Hong Kong. He is the Vice-president of the International Federation of Sport Medicine and President of Asian Federation of Sport Medicine. He is also the Secretary General of Chinese Speaking Orthopaedic Society. With his active participation in promoting sport medicine and sport science, Prof. Chan hopes that research and education achieved in Hong Kong will benefit the entire Asia-Pacific Region.

Prof Chan has also served as Vice-President of Hong Kong Medicine Association (1991-94), and the founding President of Hong Kong Association of Sport Medicine and Sport Science (1988-91) and President of the Hong Kong Orthopaedic Association (1991-1992). Currently, he serves as the Chairman of the Research Sub Committee of Hong Kong Sport Development Board and member of the Management Committee of the Hong Kong Sport Institute. Prof Chan was recently awarded an O.B.E. for his achievement and service.
