

新聞稿 PRESS RELEASE

M.Phil. and Ph.D. Degrees in Systems Engineering

The Chinese University of Hong Kong announces that applications will be invited for the graduate studies in systems engineering and other postgraduate programmes. The Systems Engineering Department was first formed in August of 1991 and admitted its first batch of undergraduate students last September. The graduate programmes, both for the M.Phil. and the Ph.D., will begin in August, 1992, for the first time.

The Systems Engineering Programme is diversified and multidisciplinary. Specialty areas include electrical control systems, automation and manufacturing technology such as CAD/CAM/CIM, robotics, information systems, and operations research.

Those applying for the graduate programmes in Systems Engineering Department should have a degree (Second Class Honours or above) in computer science, engineering, science or other related undergraduate programmes.

Full-time students can apply for financial assistance. Students with financial assistance are required to perform some tutorial duties.

Applications for admission to the Ph.D. programme can be made throughout the year. Applications for the master's degree will be made in early July.

Request for details concerning the Systems Engineering Programs, telephone Systems Engineering Department at 609-8888 or fax 603-5505.
