中大醫學院率先推行醫療質素保證計劃

香港中文大學醫學院已於其教學醫院——威爾斯親王醫院——率先實行「醫療質素保證」計劃，藉以提高臨床工作之水準及保障病人之安全。此為在本港醫院首先推行的計劃。

「醫療質素保證」是對治療病人的專業質素作經常性的檢討。計劃包括搜集資料（例如死亡、併發症和病症之形式等）及對臨床工作、資源的供應與使用情況等不斷進行檢討。其最終目標是透過監察、評估和比較來提高醫療專業的水準。

是項計劃包括定期舉行有關在治療過程中死亡或發病的檢討會議，對臨床工作作出統計，對有關危害病人治療過程的事例作出報告、紀錄及評價，及對管理情況作出檢討。

CUHK MEDICAL FACULTY FIRST TO ADOPT QUALITY ASSURANCE IN PWH

The Faculty of Medicine, The Chinese University of Hong Kong, with the ultimate aim to promote high standards of clinical practice and patient safety, adopts the principle of clinical quality assurance at the Prince of Wales Hospital, which will be the first of its kind in Hong Kong.

"Quality Assurance" means an ongoing review of the quality of patient care. It includes collection of data (e.g. deaths, complications, and patterns of illness), clinical peer review and review of the provision and utilization of resources. The objective of quality assurance is to monitor, assess, compare and ultimately, to improve standards of professional care.

The Quality Assurance Programme involves holding regular mortality and morbidity meetings; keeping statistics of clinical work; reporting, documenting and evaluating incidents whereby patient care is compromised; and review of management, in which good care is noted and bad care criticized.

To carry out the Quality Assurance Programme, the Faculty of Medicine appoints a Faculty Quality Assurance Committee which will review the programmes of all the clinical departments. Each clinical department will have its own quality assurance committee responsible for co-ordinating the programme in the department.

It can be expected that with the implementation of Quality Assurance starting July 1, 1990, the Faculty of Medicine will make significant contributions to the quality of professional patient care at the Prince of Wales Hospital.
