（一月九日）香港中文大學楊振寧閱覽室經於昨日

The Chen Ning Yang Reading Room at The Chinese University of Hong Kong which has been named after the world renowned physicist and a Nobel Laureate, Professor Chen Ning Yang, was formally opened yesterday by Professor Yang's teacher, Professor Ta-you Wu, President of the Academia Sinica. The brief ceremony was attended by some 90 guests, including staff and students of the University.

President Wu taught physics at National Southwest Associate University in China back in the late 30s when Professor Yang was a student there. President Wu is making a special trip to Hong Kong this time to honour one of his most outstanding students.

Located at the University's Science Centre and formerly serving as a staff common room, the new Reading Room with an area of 84 sq meters has recently been re-decorated with part of a generous donation of HK\$1.2 million given to the University in 1986 by Mr Chi-Ming Cha and Mr Yong-ling Liu. The donation was a tribute to Professor Chen Ning Yang, presently Distinguished Professor-at-large at The Chinese University of Hong Kong, for his outstanding contribution to the natural sciences and to education. The bulk of the donation has been used to purchase books and journals in physics.
